

Smoking cessation and the dental team
Industrialisation of the dental profession

COVER IMAGE

PENTANGLE DENTAL TRANSFORMATIONS, NEWBURY

A welcoming yet high-tech dental practice was created from an awkward two storey office building with low ceilings. A double height space was carved out for the front lobby, letting light deep into the ground floor and lifting the spirit on entering. The waiting area is curved and generous and contains internet points and a coffee bar, creating a relaxed, friendly atmosphere. Each surgery is positioned such that glass screens let borrowed light into a clutter-free space, creating a calm environment.

Architect: Richard Mitzman
